#### **Notes to Financial Statements**

March 31, 2004 (Not Reviewed by an Auditor)

#### 1. Nature of Operations and Going Concern

The Company is in the process of actively exploring and developing its mineral properties and has not yet determined whether these properties contain mineral resources or ore reserves. The Company is considered to be in the exploration stage.

The recoverability of amounts shown for mineral property interests is dependent upon one or more of the following:

- the discovery of ore reserves,
- the ability of the Company to obtain financing to complete development, and
- future profitable production from the properties or proceeds from disposition.

At March 31, 2004, the Company had incurred a deficit of \$12,352,994 and had working capital of \$4,172,616, which is sufficient to achieve the Company's planned business objectives for fiscal 2004. However, the Company may require additional financing, if the Company elects to expand it's current 2004 exploration programs and/or property commitments.

These financial statements have been prepared on a going concern basis, which assumes the realization of assets and liquidation of liabilities in the normal course of business. The Company's ability to continue as a going concern is dependent on continued financial support from its shareholders and other related parties, the ability of the Company to raise equity financing, and the attainment of profitable operations, external financings and further share issuances to meet the Company's liabilities as they become payable. These financial statements do not include any adjustments to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary, should the Company be unable to continue as a going concern.

#### 2. Significant Accounting Policies

#### (a) Use of estimates

The preparation of financial statements in conformity with Canadian generally accepted accounting principles ("GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates.

#### (b) Basis of presentation

The accompanying interim financial statements have not been reviewed by an Auditor and are prepared in accordance with GAAP in Canada with respect to the preparation of interim financials statements. # (d) Stock-Based Compensation

In the fourth quarter of fiscal 2003, the Company adopted the CICA released amendments to Section 3870, "Stock Based Compensation and Other Stock-based Payments," which requires an expense to be recognized in the financial statements for all forms of employee stock-based compensation, including stock options. Prior to the adoption, the Company disclosed the effects of accounting for stock-based compensation only to directors and employees as compensation expense, using the fair-value based method, as pro-forma information in the share capital note. In the prior year, the pro-forma disclosed stock-based compensation expense for the three months ended March 31, 2003 was \$113,911.

The fair value of stock options used to calculate compensation expense is estimated using the Black-Scholes Option Pricing Model with the following weighted average assumptions at March 31, 2004:

| Risk-free interest rate                                 | 2.80%   |
|---|---------|
| Expected dividend yield Expected stock price volatility | 104.72% |
| Expected option life in years                           | 3.30    |

Option pricing models require the input of highly subjective assumptions including the expected price volatility. Changes in the subjective input assumptions can materially affect the fair value estimate, and therefore the existing models do not necessarily provide a reliable single measure of the fair value of the Company's stock options granted/vested during the period.
